

The Highway Capacity Manual (HCM) Bicycle Mode Level of Service analysis. For each collector and arterial a BLOS analysis will be completed. The analysis results in a letter grade for each roads segment. The percentage of all segments which are BLOS A, B, or C are counted.

In 2012, eighty-three (83) percent of the collectors and arterials had a BLOS of C or better. The next update to the BLOS is planned for 2017.
